

QUALITY POLICY

"We are committed to providing best in class quality products and services that meet or exceed customer expectation through continually improving the effective management system, operational controls and active employee involvement in the Oil and Gas Industries".

We shall strive to achieve these by:

- Effective Planning and Monitoring the progress of job and controlling the execution by adopting, implementing and supporting the latest management strategic direction.
- Building up confidence and provide reliability among customers on product quality.
- Ensuring adequate resources availability in the product realization.
- Enhancing employee skill level by providing regular training in all aspects of Quality, Safety, Health & Environmental care, Technical know-how and reliability at the core aspects of our business and strive for continual improvement.
- Establishing a framework for fast and easy adaptation to changing industry trends & requirement.
- Ensuring or Emphasizing that Quality and Safety are the responsibility of every employee and functional unit.
- Ensuring meaningful and widespread employee involvement and teamwork.
- Implementing Quality Management System requirements and continually improving its effectiveness.
- Understanding and Commitment to conform to legal requirements and standards - ISO 9001, API Specification Q1, 5CT, 6A, 7-1, 16A, 16C, 7K and ASME ('U' & NB'R').

This quality policy is communicated to all the employees and relevant interested parties by displaying it at strategic locations, company website and briefing them the policy intent. In addition, it is reviewed for continuing suitability during periodic MRM.
